Education

University of Illinois Chicago (UIC)

Bachelor of Science in Biomedical Engineering

Awards and Honors; Dean's List (Spring '25)

Expected Graduation Date: **May 2028**

GPA: 3.24

Skills

Computer: MATLAB, SolidWorks, Arduino

Lab: Spectrophotometer, Microscope, Pipette, Anatomical Dissections

Language: Fluent in English and Saurashtra

Projects

Swirl-to-Mix Tenecteplase Device for Blood Clots, Clinical Applications in BME, UIC, Chicago, IL

Aug-Dec, 2025

Team Member

- Adapted an external Nasal Spray CAD model in SolidWorks, modifying geometry and tolerances to meet functionality, design, and manufacturing requirements.
- Coordinated with the team to prepare a professional design pitch, emphasizing technical feasibility and innovation.
- Conducted comprehensive research on the drug and incorporated findings into a three-page technical report.
- Presented a concise, data-driven one-slide summary of the design, highlighting key engineering decisions and outcomes.

Signal Processing of Pattern Electroretinograms, Modeling Data and Systems, UIC, Chicago, IL

Aug-Dec, 2025

Team Member

- Presented project proposal and progress updates to faculty, incorporating feedback to refine project direction and objectives.
- Implemented MATLAB code for pattern association, analyzing 346 data points to compare diseased versus non-diseased groups and their significant data trends.
- Interpreted dataset trends, identifying critical points and deriving actionable insights from results.
- Contributed to drafting the final project dissertation, integrating methodology, data analysis, and preliminary findings.

Leadership Experience

Asian American Mentor Program, UIC, Chicago, IL

Aug 2025-Present

Peer Mentor/Teaching Fellow

- Supported first-year and transfer students, fostering an inclusive and engaging learning environment.
- Delivered presentations on culturally sensitive topics to promote awareness and discussion.

Internship Experience

Mini-Med School, Downers Grove, IL

Sep 2023-Nov 2023

Intern

- Collaborated with a first-year medical student in a case study that connects osteogenesis imperfecta to osteoporosis in a presentation evaluated by medical school staff.
- Conducted in-depth research and analysis to support findings and recommendations in the case study.
- Attended lectures on human body systems, healthcare practices, and professional development strategies for success in medical and related careers.

Extracurricular Activities

Biomedical Engineering Society (BMES), UIC, Chicago, IL

Aug 2024-Present

- Attend general body meetings and actively participate in discussions on research and industry topics.
- Contribute ideas to the low-cost spirometer project, including proposing a portable usage design.
- Collaborate with teams and provide feedback and suggestions to improve functionality and design.
